

Resume - Tan Yu Ping

Computer Science Student

Web version: <https://yuptan2005.github.io/Resume/>

Professional Summary

A passionate third-year computer science student with robust backend knowledge and foundational frontend knowledge. Driven by clean and easy-to-read code, continuous learning, and a creative mindset.

Featured Projects

Game Project

C++

- First game project built using Unreal Engine version 5.7.
- Built using a hybrid approach, utilizing both C++ and the blueprint method.
- Conceptualized, designed, and developed the game idea entirely independently.

Submission Form

React, Tailwind, HTML, CSS

- Developed a functional, responsive form mainly using ReactJS for active practice.
- Designed and structured based on requirements sourced from GeeksforGeeks (<https://www.geeksforgeeks.org/reactjs/create-a-form-using-reactjs/>).

Work Experience

No professional work experience yet. Currently building robust practical experience and honing developer skills through continuous academic coursework and independent personal projects.
